JAN TX2N5927

PT- 700

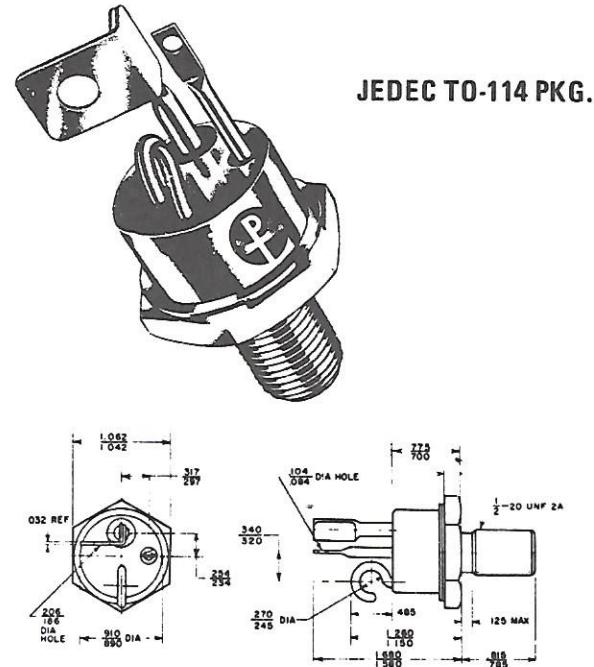

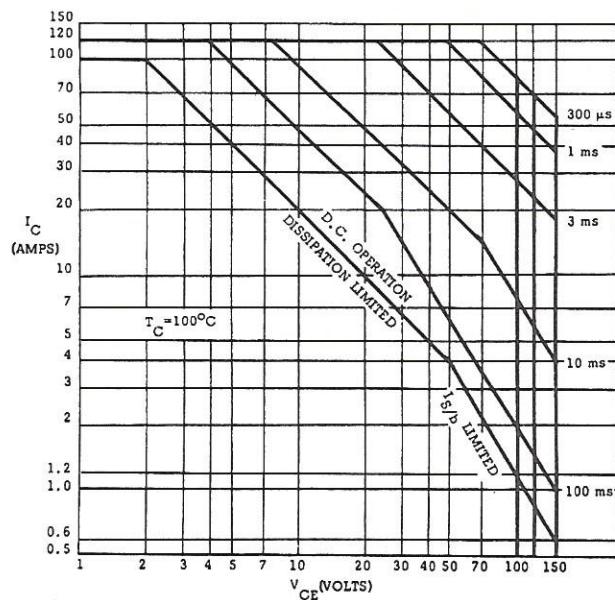

PT- 702

**SILICON NPN TRANSISTOR**

**FEATURES:**

$V_{CE(sat)}$ .....	0.75 V @ 70 A	$h_{FE}$ .....	5 min @120 A	$I_{S/b}$ .....	1.2 A @ 100 V
$V_{BE}$ .....	1.5 V @ 70 A	$t_f$ .....	2.5 $\mu$ sec	$E_{S/b}$ .....	6 Joules

**SAFE OPERATING AREA**

PowerTech's transistors offer high current capability, high breakdown voltage and the lowest available saturation voltage. They have exceptional resistance to both forward and reverse second breakdown. This unique combination of device characteristics makes them particularly suited for a wide variety of high current applications, which include series and switching regulators, motor controls, servoamplifiers and power control circuits. The transistors will provide outstanding performance when used as replacements for paralleled lower current devices, resulting in considerable reductions in weight, space and circuit complexity. Their reliability is assured through 100% power testing at 50V, 4A @ 100°C case temperature. These transistors exceed the requirements of MIL-S-19500 and are well suited for the most severe military-aerospace applications.
